POWER DISTRIBUTION BOX (LME) 70A

MODEL 611-5001-0263

LME 70A

United Electronics Corporation's Power Distribution Box Model 611-5001-0263, NSN 6120-01-475-8904, Military Model 5-4-8785 is designed to provide safe and reliable power to the Lightweight Maintenance Enclosure (LME). The U.S. Marine Corps adopted the LME as their standard maintenance shelter to provide units with a covered mobile repair facility to conduct tactical maintenance operations on tracked and wheeled vehicles across the battlefield.

The PDB has a 70-amp, 208-volt, 3-phase, 60hz inlet. The three-phase power is broken down inside the PDB into three (3) 120-volt, 1-phase, 20-amp GFCI duplex receptacle outlets, and one (1) 120-volt, 1-phase 10-amp GFCI duplex receptacle outlet for lights, all protected by thermal magnetic, single pole circuit breakers. Each duplex receptacle has an LED power indication light and the 10-amp light circuit has an illuminated light switch for easy user interface. The PDB offers an external hook that allows for the PDB to be suspended onto the shelter frame and a side bracket allowing the PDB to be secured onto the vertical shelter frame. The PDB includes a compartment to store the 10' and 25' extension cords provided.

Additional features and added benefits listed below:

Body Construction:

- Lightweight compact design (70-amp unit) 16 lbs.
- Dimensions for the model are 21"L x 12.5"W x 4.25"H.
- Large external carry handle.
- External hook and side bracket to secure PDB to shelter frame.
- Durable powder coat finish.

Electrical Features:

- Three (3) 20-AMP, 120 VAC GFCI duplex receptacles with LED power indicators.
- One (1) 10-AMP, 120 VAC GFCI duplex receptacles with LED power indicator for lights.
- One 10' and 25' extension cord with storage compartment incorporated in PDB.
- Illuminated light switch for easy user interface.
